

Africa

- Enhancing Security in Hotels

We are specialized in the African market. Tailored solutions have been developed to help hotel owners and international brands to protect their asset and build trust. Whether the hotel is in Nigeria, Ivory Coast, Morocco, Tunisia, Egypt or Kenya, we are familiar with the business culture, customs and the local people.

We assess hotel properties and hotel operations from an independent point of view and work with the hotel management closely to tailor a strategy to prevent harm to people in the hotel, as far as reasonably practicable, following the standards of good practice.

Risk Management Solutions

- Vulnerability Risk Assessments

Security Screening Coaching for Africa

Coaching security officers in how to operate screening equipment (**X-ray machine, WTMD, HHMD, ETD's**) in a environment, identifying prohibited items, and executing best practice screening protocol's. Screening of hotel guests, luggage, goods and vehicles in high and severe risk countries can sometimes be challenging.

Qualified security trainers are available that will come on site to help screening personnel to improve their skill level to meet guests, and stakeholders expectations.
